Profile

Motivated Information Technology student and full-stack web developer specializing in Python, Flask, HTML, CSS, and JavaScript. Applies strong analytical and risk-management skills from technical market analysis to building clean, responsive web applications. Highly focused on continuous learning, project execution, and delivering user-centric digital solutions for clients.

Technical Skills

Frontend	HTML5, CSS3, JavaScript, Responsive Web Design, UI Animations
Backend	Python, Flask
Tools & Workflow	Git, GitHub, VS Code, Vercel Deployment

Projects & Experience

2026 **Interactive Developer Portfolio**, *Personal Project*
Engineered a responsive, single-page web application using Flask and vanilla JavaScript. Implemented modern UI/UX features including scroll-spy navigation, CSS animations, continuous typing effects, and 3D dynamic glassmorphism cards. Managed deployment pipeline via Vercel with continuous integration from GitHub.

Previous **Technical Trading Analyst**, *Independent*
Managed evaluation capital targets through disciplined technical analysis, market structure evaluation, and strict risk management protocols. Translated high-pressure risk assessment strategies into logical, detail-oriented problem-solving skills applicable to software development.

Education

Current **BSc Information Technology**, *Osun State University (UNIOSUN)*, Osun State, Nigeria

Completed **Pre-Degree (JUPEB)**
